Good evening Plessy Families,

I wanted to provide everyone with an update on the water filtration installation. Today water filters were installed on 3 out of 4 water fountain stations in the building. It is anticipated that the project will be complete by close of business tomorrow.

I have been working closely with Orleans Parish School Board and we have agreed that in the interest of student safety and wellbeing, the water will be tested for the presence of lead. The testing will happen Monday morning. When the testing is conducted the water sources will be disconnected from the filters to ensure an accurate test. When we receive the results we will update all families.

I will provide additional updates as they become available, and as always please reach out to me if you have any questions or concerns.

Best,

Meghan
